South Maiz Para, Eidgah, Cox's Bazar, Bangladesh

Professional Summary

Computer Science graduate with strong foundations in networking, system analysis, and data analytics. Skilled in TCP/IP, database management, and real-time monitoring concepts, with hands-on experience in developing AI-based and data-driven systems. Capable of analyzing system performance, detecting issues, and supporting efficient decision-making through structured data insights. Eager to start a career as a System/Network Analyst or Data-focused role in a dynamic organization..

Technical Skills

Languages: Python(Numpy, Matplotlib, Pandas), SQL, Bash Scripting, C, C++

Tools: Microsoft Excel(Advanced formulas, Pivot Tables, Lookup functions), Microsoft Word, Databases.

SCADA & Automation: Basic knowledge of SCADA System, real-time monitoring.

Networking: TCP/IP, Basic industrial communication (Modbus).

OS: Linux, Windows, MAC

Monitoring & Analysis: System monitoring, fault detection, reporting.

Ethics & Compliance: Data protection principles, Responsible & ethical data use.

Education

International Islamic University Chittagong (IIUC)

Jan 2022 - Jan 2026

Bachelor of Science in Computer Science and Engineering (CGPA: 3.05 / 4.00)

Chittagong, Bangladesh

- **Relevant Coursework:** Intro to CS I and II (C, C++), Data Structures and Algorithms (C++), Prob and Stat (Data analysis, indicators), Database Management Systems, Systems Analysis and Design (Information systems), Computer Networks, Cyber Security, Software Engineering, Social, Professional and Ethical Issues in Computing (Ethics and accountability), Technical Writing and Presentation (Reports and data presentation)

Hazera taju Degree College

Feb 2018 - Jul 2019

Higher Secondary Education(HSC) (GPA: 5.00 / 5.00)

Chittagong

Al masia Fazil Madrash

2014 - 2015

Secondary School Certificate(SSC) (GPA: 5.00 / 5.00)

Eidgah, Cox's Bazar

Academic Projects

AI-Powered Real-Time Intrusion Detection System (NIDS)

Academic Course Project

Computer Security Lab Course

- Designed and developed an AI based Network Intrusion Detection System using Machine Learning to detect cyberattacks in real time.
- Trained a Random Forest model on the NSL-KDD dataset achieving 99.86 percent detection accuracy for identifying malicious traffic.
- Implemented real-time packet sniffing using Python (Scapy) to monitor live network traffic and extract key features.
- Built a detection engine to classify attacks such as DDoS (SYN Flood) and Port Scans based on network behavior patterns.
- Developed an automated logging system to record detected threats for forensic analysis and reporting.
- Performed attack simulation and testing to validate system performance under real-world scenarios.

Employee Leave Management System

Academic Course Project

Software Development Course

- Designed and developed a web-based Employee Leave Management System using PHP and MySQL.
- Implemented role-based access control for employees and administrators to manage leave requests and approvals.
- Designed relational database schemas and performed CRUD operations for employee and leave data.
- Ensured data integrity, basic validation, and maintained structured records for administrative reporting.

Certifications

Introduction to Data Analytics

IBM Data Analyst Professional Certificate - Coursera

- Understood the complete data analytics lifecycle from data collection to visualization
- Learned key roles in the data ecosystem including Data Analyst, Data Engineer, and Data Scientist
- Gained knowledge of different data types, structures, and file formats
- Practiced core data analysis steps such as data wrangling, analysis, and basic visualization

Excel Basics for Data Analysis

IBM Data Analyst Professional Certificate - Coursera

- Used Excel to clean, organize, and analyze program data for reporting purposes
- Applied formulas, filters, look-up functions, and pivot tables to generate data summaries

Networking Basics

Cisco Networking Academy - CISCO

- Learned core networking concepts, including network types, components, and communication principles.
- Gained hands-on knowledge of IPv4/IPv6, DHCP, routing, and network segmentation.
- Explored TCP/UDP protocols, application layer services, and wireless/mobile networks.

Training Programs

- **Fresh Graduate Engineers Training Program 2025** *Dec 21, 2025 - Dec 30, 2025*
The Institution of Engineers, Bangladesh (IEB), Chattogram Centre
- **3rd International Conference on Innovation in Science, Engineering and Technology** *4 days*
International Islamic University Chittagong (IIUC), Chittagong

Languages

- **English**
Speaking: Medium Listening: High Writing: High
- **Local language (Bangla)**
Speaking: High Listening: High Writing: High
- **Hindi/ Urdu**
Speaking: Medium Listening: High Writing: Low
